

CLASSES WITHOUT PREREQUISITES (as of 7/01/11)

Sampling Students – Prime Timers, Explore GPC, etc. – are able to take up to 12 hours of credit without having to be evaluated in English, mathematics and reading. However they are only able to take courses that **do not** require exit or exemption from Learning Support without taking the placement tests or having transcripts evaluated.

The following classes are the courses that do not require a student to have exited Learning Support requirements, so are open to registration for sampling students. Should the student wish to take courses not on this list then they will need to exit the required Learning Support areas. Additionally if they want to take Learning Support classes, they need to be evaluated. Not all classes on this list are appropriate to all majors.
